

WHITEPAPER MUSKMAN

INU

**MUSKMAN INU
\$MMAN**

INTRODUCTION

Our journey will be the answer to a simple question.

What would happen if a cryptocurrency project was 100% run by its community?

While the term DeFi literally includes the word decentralized, this is in reference to economic status as opposed to its internal hierarchy. Our founder, Muskman, said this of our beginnings: "We are an experiment in decentralized spontaneous community building blockchain projects."

While none of us could have imagined it at the time, this could be a concept that would start a revolution in the meme coin ecosystem.

Projects built on the foundation of community involvement are the untamed wilderness of our future. As we move further away from rigid financial structures and traditional mindsets, we become free to discover new ways to solve problems and relate to one another.

In a world ruled by the commodification of time, community-run projects are more than just a change of pace; they are a way to practice the radical acceptance of others.

When success depends on the shared strength of the individuals who make up a collective, we are forced to shift our perspectives to align with those around us. The Muskman Inu Ecosystem is our way of recognizing the importance of tearing down this long-established paradigm.

A community is held together by hundreds, if not thousands, of interconnected moments. By studying those drawn to our project, we realized that true strength doesn't come from one of us alone; it comes when we work together in harmony.

With that thought bright in our minds, we began developing the Muskman Inu Ecosystem in earnest.

To be honest, I don't get #Muskman. But this shows the power of decentralization. What you think may or may not matter. If a large enough number of people in the community value it because it's cute or because they like the meme, then it has value.

2ND

WHY DECENTRALIZATION?

We are standing at a pivotal moment in innovation.

Until now, centralization has been a prerequisite for all of our official structures. Political, educational, and financial systems are, and have always been, crafted in a way that does not equally and ethically distribute power to those functioning within them. There have been times in our history where this sort of internal structure played an important role, but in an age with the information of the world available at the click of a button, it's time to rethink.

2022 opened our eyes to how little control the average person has in the face of these overarching, generational structures when GameStop and AMC stock values exploded seemingly overnight. Wall Street Bets tested the waters of what it would look like to disperse control to consumers and inexperienced investors alike.

It was inspiring, but it didn't last long. Just when the movement seemed to be on the brink of success, it was throttled by the bureaucracy of our centralized society. However, not before this concept of a new power among the people took root.

Months before any of these events made international news, Muskman was already setting his 100% community-based cryptocurrency experiment into motion.

Cryptocurrency itself comes from the idea of redefining wealth and how it can be acquired, which goes against traditional processes by its very nature. And yet, most, if not all, cryptocurrencies function within enforceable rules. It's easy to see when we look back at cases like the SEC's win over the Kin Ecosystem (a centralized authority) or when we consider how the centralized crypto exchanges seem to use centralized authority to offer "benefits" over their decentralized partnerships. In the ever-shifting economic landscape, cryptocurrencies that do not take their independence into their own hands struggle with a tenuous existence.

When the rules of the game are changed in their favor, they have no option but to comply, regardless of the consequences.

OUR BACKGROUND

Muskman approaches the creation of our community from a unique perspective.

"We believe that through the power of collective decentralization, we can build something stronger than a centralized team ever could."

"A community-run token is nothing without the united individuals who give it purpose."

From the early days of Muskman, we will be known as the Muskman Army, both amongst ourselves and across countless other platforms. This wasn't just a name. For many, it became part of their username, their handle, and their avatars or profile pictures, which they switched to our adorable Muskman sporting a beret.

Whether you are a new recruit or part of the old guard, if you fly under the Muskman banner, you must embrace our founding principles:

1. We started from zero, with zero. It's in the spirit of our project to create something out of nothing.

2. We were not founded by an existing community, let alone a preassembled team. The brilliant minds behind Muskman had never collaborated before. They were a fresh team of developers, designers, moderators, marketers, and shillers. When you joined the Muskman army from anywhere in the world, you found where your talents could be used best and got to work.

3. We love Muskman. Starting with nothing means everyone has to bring something to the table. The holders and believers in our Muskman Army have been the source of all our success.

You and our fellow holders, admins, moderators, leaders of international chat rooms, social media influencers, meme makers, shillers, and most of all, friends

THANK YOU in ADVANCE. You are the real #MUSKMANARMY, and we salute you.

Meme coins are huge parts of the crypto trading landscape, whether we like it or not. While the biggest currencies like bitcoin and ether have very low volatility, it's only natural that traders will look for opportunities elsewhere.

WHY BSC & ETH

When comparing different blockchains, you might wonder why we chose to stay on the BSC and ETH networks. The answer, like the rest of our project, is straightforward and purposeful.

Our founder, Muskman, embarked on the Muskman INU journey with a predisposition towards BSC and ETH in the first place. It's already secure and well-established, and it truly allows us to stay decentralized (unlike some of the "fad" networks).

His top priority was to ensure that his project was free to change and evolve with zero outside regulations impacting it, and BSC and ETH were the way to achieve that goal.

Our army is able to hold their own tokens in a wallet and collect payments from around the world, all while remaining independent of moderating forces.

Our founder also chose to burn 50% of the total supply into a dead wallet.

"There is 100% greatness without a vulnerable point, and as long as Fairlaunch holders hold, then MUSKMAN Super Token \$MMAN will grow and survive."

These aspects of BSC and ETH are what made them the perfect foundation for Muskman Swap, a truly decentralized exchange where you can trade, buy, sell, and HODL to gain rewards that far outstrip the value of other staking platforms.

Muskman Swap is poised to become the most popular and highest-volume exchange, with a laser focus on Bep-20 and Erc-20 tokens and the Binance and Ethereum blockchains.

Designed as the quintessential Bitcoin equivalent, #Muskman features zero venture capital (VC) investments, zero private equity investments, no pre-mining or reserves for the team, and is wholly operated by the community through open-source smart contracts.

5TH

Muskman Swap VISION

We are dedicated to building the best decentralized ecosystem on the planet.

Our three tokens were the seeds from which the Muskman Inu Ecosystem sprouted, and Muskman Swap is how they've dug in their roots.

The goal of Muskman Swap is to provide a safe place to trade your valuable crypto while remaining decentralized. We are loyal to our holders, and that gives us the means to grow exponentially. We will constantly scale this ecosystem so it may bring ever-increasing numbers of interested parties to the Muskman Swap platform.

Our unique tokenomics, solid design, technical implementation, and viral growth from our good 'ole fashion memes will reinforce the platform's strength and ultimately provide residual benefits to the ecosystem.

Making a swap without a budget is a unique challenge, but by tackling various genres and product lines, a focused development team rose from the ranks of our community.

We know that with our unified force and the power of Muskman, we will be successful in advancing the swap and ecosystem as a whole so that we reach new and spectacular heights together.

The best is yet to come!

The paper money disappears, and crypto-currencies are a much better way to transfer values than a piece of paper, that's for sure.

6TH

ECOSYSTEM TOKENOMICS

Muskman Inu Token and the Muskman Army have evolved beyond a simple experiment.

As of the publication of this document and the release of Muskman Swap, we have become a decentralized ecosystem enriched by its own DEX.

This redefines \$MMAN as more than it could ever be by itself and is why Muskman Inu will outperform, outlast, and outshine every crypto that attempts to emulate it.

Muskman Swap will highlight our three flagship tokens:

Muskman Inu: \$MMAN

Twitter Shiller: \$TSHIL

Twitter CEO: \$TCEO

You will also be able to exchange one token for another.

Muskman INU will mint TSHILs with BNB backing that will be distributed to the Twitter Shillers, aka #MUSKMANARMY.

Muskman INU will mint Twitter CEO TCEOs with BNB backing for users participating in the ecosystem's voting process, and the holder will be treated as the CEOs of Muskman INU protocol and will be responsible for future decision-making.

Muskman Inu

Twitter Shiller

Twitter CEO

Tokens do not become smart just by being added to the smart contract; they become smart if you code them to be smart.

Muskman INU (\$MMAN)

\$MMAN came into this world in May of 2023. After we finish minting A 100 quadrillion tokens (100,000,000,000,000,000), we have put 50% into Fairlaunch and Liquidity and the remaining 50% is "burned" to the dead wallet.

\$MMAN will be ground zero for so many coming projects. We will be the first to allow diamond hands to hold millions, or even billions, of our tokens in their wallets, as well as being the first spontaneous community-building experiment in a decentralized setting.

With our Shiller's earning more TSHIL, will make us viral and the value of \$MMAN will grow exponentially.

We will be recognized around the world, potentially even by _ Elon Musk.

Muskman INU will be the first cryptocurrency token to be listed and incentivized on Muskman Swap, our very own decentralized exchange, immortalizing it in history forever.

- **Total Supply** = 100,000,000,000,000,000
- **Burned** = 50,000,000,000,000,000
- **Fairlaunch/Liquidity** = 50,000,000,000,000,000

I am a BNB-backed token, and only can be earned by Twitter users who perform Muskman's Twitter Shilling.

What's TSHIL?

8TH

Twitter Shiller (TSHIL)

I am a BNB-backed token, and it can only be earned by Twitter users who perform "Muskman's Twitter Shilling." I am the blood for the FUD created by Twitter users by shilling Muskman's \$MMAN token.

Reward twitter
shillers

I am a BNB-backed token, and it can only be earned by participating in the ecosystem voting process.

What's TCEO?

9TH

Twitter CEO (TCEO)

I am a BNB-backed token, and I can only be earned by voting for ecosystem decisions.

Reward Voters

Taxes are the lifeblood of communities, and no taxpayer should be permitted to escape paying his just share of the burden of contributing thereto.

TAX

Taxes are the backbone of any economy. But only if they are used for the welfare of the community and the development of infrastructure.

\equiv 5% Fixed tax

The Sales tax will be utilized for Reflections in \$MMAN to all the holders, Marketing activities, TSHIL/TCEO BNB Backing and Liquidity.

	\equiv 1%
	\equiv 1%
	\equiv 1%
	\equiv 2%

Roadmap 2023

Phase 1

- Fair Launch on Pinksale.
- CoinGecko/Coinmarketcap Listings
- 2,000+ Holders
- DeFi platform launch (Farming, Pools)
- Get \$MMAN Trending on twitter.
- Engage with the \$MMAN community on social media.
- Meme competitions and giveaways

Phase 2

- Introduce TSHIL/TCEO Tokens for community members.
- Aim for listing on additional exchanges to increase accessibility.
- Expand the team to further improve the platform and coin utility.
- Launch Dex platform.
- Strategic partnerships within the crypto industry.
- DAO Platform Launch.

Phase 3

- Influencer Campaign
- Marketing Push via social media
- 10,000 family members
- Continue to innovate and expand the MMAN ecosystem by adding new features and services, always with the goal of making the MMAN family stronger and wealthier.
- New Roadmap released for 2024

Muskman did it so that everyone knew his intentions; he also renounced the contract ownership so that it could be fully decentralized.
